ALWAYS MOVING FORWARD...

Trotting Higher, Driving Harder, Moving Forward, is more than just our motto at Windermere Farms. Since the first registered Percherons arrived here over five decades ago, it has been a creed around which we have centered our breeding philosophy and passion for Percherons. We strongly believe that failing to achieve progress, accelerate standards, or realize new possibilities when breeding purebred livestock, simply means that you are going backwards. This is why we have endeavored to breed Percherons in a forward-thinking way, with a focus on bettering our herd, the breeding programs of our clients, and the breed as a whole, year over year. Accomplishing perennial progress requires a consistent scrutiny of one's own breeding program, along with the unrelenting and careful selection and utilization of only the very best individuals available. As such, the stallion offering you will find in this catalog runs deep with pedigree, conformation, size, modernness and athleticism; providing the genetic potential and breeding dominance to enrich our broodmare herd, as well as those of our valued customers. That is the criteria that must always be met for a stallion to earn his spot in our breeding shed. We take our duty to our clients and customers, as well as the positive influence and impact these stallions can provide to the Percheron breed, very seriously. Our stallions' success and genetic reach is truly dependent upon the success of our fellow breeders who choose to utilize these individuals in their breeding programs. For this reason, we pledge to deliver quality and viable semen from our stallions, and provide the assurance and customer service of being just a phone call away to discuss and consult with you about optimal stallion selection for your mares, and their reproductive management.

We have the utmost appreciation for the business partnerships we maintain with so many loyal Percheron breeders, and we would like to thank each and every one of you for your patronage over the years.

For 2021, we are pleased to again offer the three-time National Champion and five-time All American, Anderson's Bentley for public service. Bentley's offspring are quickly making their mark and finding themselves in high demand in both the show and sale rings all across the country. We will also be again standing Lola's Eightball; the All American son of the past National Champion, Windermere King Cong. We are anxiously awaiting his first foal crop at Windermere, from some of the very best broodmares in our herd. We will also be expanding the genetic diversity of our stallion line-up with the addition of Kauffman Farms Eliminator; a stallion that will offer our customers, (many of whom have Windermere bloodlines), an opportunity to include some different genetics into their breeding program. Eliminator has a pedigree that includes many notable sires of the past, including McGee on the top side, and a dam sired by the well-known Blackhome Duke son, Windward's Torin. His maternal granddam was an impressive Spirit Poseidon daughter- a mare well ahead of her time. We will also be offering frozen semen from two of the greatest sires to ever stand at Windermere Farms; the late Windermere King Cong (Two-Time All American & National Champion), and Windermere's North American Maid (All American & Supreme World Champion).

To inquire about the stallions in our 2021 Line-Up, please feel free to contact us. Be sure to follow Windermere Farms on Facebook and Instagram to see additional photos of the studs, as well as our quality broodmares and young stock. We look forward to working alongside you in 2021 for the betterment, success and progress of the Percheron Breed!

Sincerely,

-Gerald, Melissa & Abraham Allebach
